

COMPANY PROFILE

XangLao Engineering Consultants Ltd (XangLao), founded in Vientiane in 2011, is a Lao engineering firm that provides innovative multi-discipline engineering and consulting services. We are experienced with regional and international standards (AS/NZS, IEEE, ISO, etc) and committed to quality and value-adding services to our clients while aspiring to develop professional engineers and promote engineering in Laos. XangLao's co-founders have studied and worked in the USA, Australia, Japan, China, and ASEAN countries, and have work experiences in various industries including construction, electricity and mining.

VISION

To build a sustainable and reputable Lao engineering firm that provides hi-tech consulting services in diversified engineering disciplines

SERVICES

CIVIL & ELECTRICAL ENGINEERING – our Civil engineering and consulting services include design calculations, surveying and testing, CAD drawing and 3D modeling, steel structural design, cost estimates, and material takeoffs, and more. In conjunction with the Civil, our Electrical engineering covers diversified electrical designs and studies for residential/commercial offices as well as industrial systems, such as transmission and distribution, power flow modeling, process control systems, and instrumentation.

ARCHITECTURE & INTERIOR DESIGN – our experienced team of architects can work with you to design modern or Lao-style buildings, and creative and unique interior designing. Our architecture services also include final design check, material selection, preliminary & detailed cost estimates, and building extension & renovation consulting. We design homes & spaces that fit client's needs.

INDUSTRY & PROJECT CONSULTING – at XangLao, we have collective engineering expertise and experience in various industries such as construction, electricity, mining and manufacturing. We have experience working with international consultants and providing assistance in coordination with Government organizations and state enterprises. We also provide project consulting, including planning, resourcing, and commissioning as well as services in organizing technical workshops in Laos.

XangLao is committed to quality services while seeking to develop world class engineering in Laos
